

Instructions for a Free E-Mail Account

1. Go to www.yahoomail.com
2. Click on **SIGN UP NOW**.
3. Click on **SIGN UP FOR YAHOO E-MAIL**.
4. Fill out each box with required information:
 - Where it says **Yahoo ID**, type any name/nickname you want. It must be at least 6 characters. If you add numbers, it makes it easier to find a nickname that has not already been taken. It happens very often that nicknames are not available because somebody else is already using them. **Be creative!**
 - **Password:** Any word you can remember (for sure!) and that only you know. You can add numbers also. You will be asked to type the password into two boxes. Make sure you type it exactly the same way in both boxes.
 - You will need your ID and password each time you want to access your e-mail. If you think you will not remember them, write them down in a safe place.
 - **Secret Question:** Choose any question and type a short answer.
 - **Alternate E-Mail:** Leave blank.
 - **In "Industry/Title:"** Skip it, or just choose "Other" if you do not want to answer.
 - In the box where they ask you for the **code**, type the letters/numbers you see in the big black box.
5. Click on **I AGREE** and press **ENTER**.

YOU NOW HAVE AN EMAIL ADDRESS!!

Sometimes it says you need to check the fields highlighted in yellow. Just fill out the corresponding boxes again and press ENTER.

If it says the ID name you chose is not available, you will have to choose a different one or add some numbers to it.
